

# UNITED STATES SENATOR FRANK J. CANNON, OF UTAH, AND EX-GOVERNOR CHAS. P. JOHNSON, OF MISSOURI.

United States Senator Frank J. Cannon, of Utah, a leader of the silver movement in the Senate, is one of the foremost political orators of the day. He is a progressive statesman. It was Senator Cannon who contributed one of the choice bits to the literature of the war with Spain. In his speech in the Senate in favor of war, he threw down the gauntlet to the peace faction when he declared: "I am for peace, for lasting peace, but it can only be reached through the brazen gates of war." The Senator apostatized finally from the Republican party when he voted against its latest tariff measure. It was he who read the message of defiance and farewell to the Republican party, an important document, of which he was the author, before bolting the National Republican Convention in St. Louis in June, 1896. Senator Cannon is engaged in a campaign for his own re-election to the Senate on a combined silver Republican, Populist and Cannon faction Democratic ticket in Utah. It is arduous labor including the making of four and five speeches a day. To stimulate him to these endeavors he is taking Paine's celery compound, and of its success he writes:

"I cannot speak extravagantly of Paine's celery compound, for to speak merely the truth would seem extravagance of speech to those who do not know its value. It nerves to unusual endeavor, such as that required by an exhaustive political campaign, as no other tonic can. It lacks the dangers of alcoholic stimulants, and supplies the place of food. I owe much to Paine's celery compound, more, indeed, than to any other remedial agent in the world. Yours truly,

*Frank J. Cannon*

These Two Eminent  
Statesmen Testify  
to the Benefits De-  
rived from Paine's  
Celery Compound  
as a Nerve Tonic  
for the Exhaustive  
Strains of Their  
Political and Pro-  
fessional Duties.

## Paine's Celery Compound

Makes  
People  
Well.

Ex-Governor Charles P. Johnson is in active practice of the law in St. Louis. He is the leader of the criminal bar in the West and is conceded to be the most scholarly criminal lawyer in America. He has defended 110 men charged with murder and lost but one case, that of the millionaire murderer, Duestrow, who was hanged at Union, Mo., last year. The case was one of the longest and most bitterly contested in the history of criminal law, and the ex-Governor's pleas are preserved among the choicest specimens of the literature of the law. Dr. Spitzka, the eminent New York alienist, gave testimony on behalf of the defence. The ex-Governor is sixty years old, but a man of splendid physique, and known as one of the handsomest men in Missouri. He attributes his excellent health, good looks and marvellous powers of endurance to the use of Paine's celery compound. He has used it for five years, when slightly debilitated or when in preparation for a case promising an unusual nerve strain. He writes of Paine's celery compound:

"When I am preparing for an important case I always fortify myself with Paine's celery compound. The intense concentration required in the study of a great criminal case saps the vitality of the counsel, and I know of no artificial aid which so supplies this lack as the compound. I recommend it to my brother lawyers, and to all the world of workers as a tonic that is safe and pleasant and vastly strengthening. Yours truly,

*Chas. P. Johnson*

When the history of Paine's celery compound is studied it is easily understood why its popularity is so enormous. Paine's celery compound is the world-famed discovery of Edward Elisha Phelps, M. D., LL. D., professor of materia medica at Dartmouth College. Professor Phelps's unusual talent established his reputation and prominence among his professional brethren. Appointed lecturer on materia medica and medical botany in Dartmouth College, he continued a member of the faculty until a few years before his death, in 1880.

For a long time previous to his demise he was fully alive to the dangers attendant upon the American way of living, and he sought diligently for some scientific, common-sense remedy that would cure the common evils which, under one name and another, result from an unhealthful state of the nervous system. His labors were crowned with glorious success, and he gave to the medical profession the celebrated remedy which has since won

world-wide fame as Paine's celery compound.

This remedy, which ever since has been freely used and prescribed by the most eminent of the profession, endeared Professor Phelps's name to the world, and made his life an era in the practice of medicine. The wonderful remedy was found to be all Professor Phelps had claimed for it, namely, a great nerve and brain strengthener and restorer. Beyond doubt it was demonstrated that Paine's celery compound would cure nervous debility and exhaustion, neuralgia, sleeplessness, dyspepsia, malaria and all blood diseases. It was, moreover, as harmless as it was excellent.

Paine's celery compound is not a patent medicine, it is not a sarsaparilla, it is not a bitters or mere tonic; it is not an ordinary nerve-line. It is as superior to them all as Greater New York is superior to some backwoods town.

It is a medicine for the aged as well as for the young. The fact cannot be too strongly emphasized

that Paine's celery compound is a physician's remedy, and, as such, is freely used and prescribed by many of the most eminent practitioners. The formula is furnished to reputable physicians, and hence they have the utmost confidence in prescribing it, for they know it to be as harmless as it is beneficial.

If its use is persevered in Paine's celery compound will cure. The first bottle will benefit. The nerves will grow stronger, the digestive organs will gain tone, and health will be surely returning.

There is such a demand for Paine's celery compound that the druggist's stock is oftentimes sold out, and then the patient has to wait and suffer until more is received. As, however, it keeps perfectly, the last drop in the bottle being just as full of curative power as the first, there is no chance of losing anything.

Citizens of Greater New York, is it not extreme folly to take medicine to cure effects instead of using Paine's celery compound to get rid of the cause?

For all of those diseases which are really the result of weakened nerves, such as dyspepsia, headache, rheumatism, liver and kidney troubles and malaria, Paine's celery compound is the only remedy

that absolutely cures. It has done greater good to the human race than any other discovery of the nineteenth century, and well deserves the grateful praise of the thousands whom it has snatched from the jaws of death.

It will not do to neglect the little ills, the aches and pains, the "all gone" and tired feelings that the majority of people look upon as trifles. It must be remembered that delays are dangerous, and that the weak, irritable feeling of to-day may to-morrow be the terrible visions of nervous debility, sleeplessness, melancholia, paralysis, insanity, or that dreaded paresis, which ends only in death.

While there is life there is hope. Yes, hope, provided that you use this great compound and thereby strengthen the nerves, purify the blood and give health to both body and brain.

There are thousands of homes in Greater New York that have felt the wonderful benefits of Paine's celery compound; there are thousands of men, women and children in all ranks who have been saved from suffering by its use.

It is safe to say that there is no other remedy which is so generally used and so largely sold in Greater New York. If there were the slightest doubt about it the can-

vas which is here spread before the public would quickly convince the most sceptical.

The testimonials that could be gathered from the inhabitants of Greater New York as to the good results that they have experienced from the use of Paine's celery compound would by themselves fill a large-sized book. Everywhere the same praise is heard from those who have been so fortunate as to try this grand remedy. If you, who read this, should be a sufferer from any of the ills described above, and if you have not yet sought relief through Paine's celery compound, seek out some neighbor who has given the compound a fair trial, and ask him what he thinks of it as a health restorer. He will tell you that there is nothing like it; that it is the remedy of all remedies.

If you want to be well and strong and rejoice in perfect health, use Paine's celery compound. Its superiority over ordinary sarsaparillas, bitters and nervines has been proven in hundreds of instances right here in our own city.

And be sure you get Paine's celery compound. Don't allow any one to sell you something else when you want the best of remedies. There are some dealers who have so little regard for the health and

lives of their customers that for the sake of a few cents' extra profit they will urge their patrons to buy some worthless imitation or substitute when asked for Paine's celery compound, the remedy that makes people well.

Here is how you may know the genuine article from the imitation, the real diamond from that which is of paste. Every bottle of Paine's celery compound, as well as the pasteboard box in which it is packed, bears a label containing a picture of a bunch of celery and the words Paine's celery compound.

In matters of health and life you cannot afford to take risks. You want and should insist upon getting the best medicine in the market. Paine's celery compound, the discovery of Professor Edward E. Phelps, D. D., LL. D., of Dartmouth Medical School, is to-day universally recognized as the best medicine in the world. It is the only one publicly indorsed and recommended by members of the United States Congress, by prominent ministers of the Gospel, by merchant princes and bank presidents, and by thousands of men and women in every State of the Union, who, while not so prominently in public life, are not less worthy of confidence.

Do not buy Paine's celery compound from any pedler or agent. The genuine is never sold in the street or from house to house.

Don't buy any celery preparation unless both the box and bottle label bear the words, Paine's celery compound, prepared by Wells, Richardson & Co., sole proprietors, Burlington, Vt. Then only will you be sure of getting the famous and genuine Paine's celery compound.

What medicine ever before made an offer like this? Here is a special request the proprietors make to the leading medical men of the country:

"Many physicians are prescribing Paine's celery compound with great success, having found it superior to all other remedies in the diseases for which it is recommended. We carefully urge all physicians to write to us for the formula of Paine's celery compound, which we will mail on application, that they may satisfy themselves of its harmless character and great value. We are particularly anxious to have this compound tried in cases that have resisted the usual methods of treatment, that we may prove the truth of our statement—Paine's celery compound cures."

That coin has the true ring about it, has it not?
